DETAILED ACTION

Response to Amendment

The amendment filed on 8/6/04 has been considered.

Claims 1-10 are pending.

Response to Arguments

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

Claims 1-4 and 10 remain rejected under 35 U.S.C. 102(a) as being anticipated by Reiger et al Oncogene vol. 17 p. 2323 (11/5/98). The reasons for this rejection are of record in the paper mailed 2/9/04.

Applicant files a 131 declaration to overcome this rejection. This declaration is insufficient for the following reasons. First, the declaration does not contemplate the general screening process. Exhibit 1 only shows that one compound is NOS2 inhibitor. Identification of one compound is not representative of a screening process. Exhibit 2 (paragraph 8) is merely prophetic and does not constitute reduction to practice. In fact, this paragraph does not even mention a screening assay. Thus, the declaration does not contemplate a screening process. Second, the reference cited in the rejection uses cytokines and LPS as the inhibitors. The declaration shows that the inhibit is

aminoguanidine. In order for the 131 declaration to overcome the art rejections, the declaration needs to show the agents in the reference. Applicant is directed to MPEP 715.03 which states "where generic claims have been rejected on a reference or activity which discloses a species not antedated by the affidavit or declaration, the rejection will not ordinarily be withdrawn, unless the applicant is able to establish that he or she was in possession of the generic invention prior to the effective date of the reference or activity." Applicant has not done this.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein

Art Unit: 1642

were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

Claim 8 remains rejected under 35 U.S.C. 103(a) as being unpatentable over Reiger et al Oncogene vol. 17 p. 2323 (11/5/98) in view of applicant admission on page 17, lines 26-31 of the specification). The reasons for this rejection are of record in the paper mailed 2/9/04.

Applicant's arguments have been addressed above.

Allowable Subject Matter

Claims 5-6 and 9 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not

Art Unit: 1642

mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
